PRECAUTIONS FOR USE

The VCTE examination with FibroScan® device should be performed according to the manufacturer recommendations and fulfill good quality criteria. The software is not intended as a primary diagnostic tool by physicians or to be used as a substitute for professional healthcare advice. Each user is responsible for ensuring compliance with applicable international, national, and local clinical regulations and other specific accreditations requirements. The results obtained must be interpreted by a physician experienced in dealing with liver disease, taking into account the complete medical records of the patient.
